- Ability to enter staff availability for fulltime, part-time and PRN employees
- Configure shifts and set minimum employee standard per shift
- Staffing PPD
- Reporting and PTO management
- Management Dashboards

## About Us

The cueSHIFT Employee Staffing Application is designed to allow facilities to generate and update employee staffing while monitoring facility staffing needs based on patient days or by minimum staffing requirements. Text message alert system notifies staff of available shifts, improving communication and speed of covering staffing needs. Staffing information can be reviewed and monitored providing better management of employee payroll budgets. The Dashboard Feature allows easy monitoring of staffing needs and employee time off at a single glance.
